

Akonni Biosystems is Recognized with Frost & Sullivan's 2017 New Product Innovation Award

Based on its recent analysis of the microarrays in molecular diagnostics (MDx) market, Frost & Sullivan recognizes Akonni Biosystems with the 2017 North American New Product Innovation Award. Akonni's integrated MDx system, TruDiagnosis®, is revolutionizing the point-of-care molecular testing market by enabling target detection from a variety of sample types. TruDiagnosis® is powered by TruArray®, a patented 3D gel-drop microarray technology for sample screening that instantly indicates the presence of disease markers in real time.

“**Akonni Biosystems is well positioned for higher growth due to the versatility and effectiveness of its diagnostic products, customer-friendly approach, strategic execution of business prospects, and cost effectiveness.**”
